Good morning everyone

In keeping with the policies set at this property we would like to remind each of you that the day after we have a snow event we will need to have all of the cars removed from the lots so that MNM Maintenance can clear the lots and the parking spaces.

We will continue to send out reminders for the major storms however this procedure is ongoing.

Management just received word that the PH level is off in the pool and we are unable to stabilize it at this point. Don from Pichette Pools will be at the property on Wednesday morning to review the issue. Until such time the pool passes the PH test it will be closed.

Thank you.

Connie Garland
