Good morning everyone

The Board has had a very busy month getting the summer projects under way. If you live in building 2 or 3 the new intercom systems will be installed in early June. This is a system that requires your telephone number so that you can release the door for your visitor. Please send me the preferred telephone number you wish us to use.

Sam Cooper will be paving the front entry and a large area between building 3 and 4 by the dumpster area. This will happen weather permitting on June 27th and 28th.

We are waiting for a start date on crack filling and line striping from NH Blacktop. Bill is in the process of painting the "P" spots and numbers in the lot.

Gutter Done has been hired to install some additional gutters behind building 2 and in front of building 3.

Building 4 stairwells will be having new carpeting installed within the next 30 days.

Collins Tree Service will be meeting with the board and management to discuss trimming and tree removal in areas throughout the property.

Please feel free to email any questions or concerns to either the board or management.

Please remember for those of you on the first floor that are permitted to have gas grills they need to be 10 feet from the building when you are using them.

Thank you and have a great holiday weekend.
