Good afternoon everyone

With spring here there are contractors, moving contractors and other service providers at the property.

Please be reminded that you directly responsible for any trash clean up or damage to the property that your contractor does while doing their jobs.

If you are having any carpentry, plumbing or flooring done it is required that the contractor take all of the items out of your unit and dispose of them off site. They cannot be place at or inside the dumpsters.

Thank you and happy spring!

Connie
