Packages!

Have you seen the news lately, all stations, all states, where people are taking packages right off the steps or patios? With security cameras? Folks even following UPS or FedEx trucks waiting for packages to be left?

Well we have the same issue here at Oak Bridge. In the past 2 weeks, the Board has been notified of multiple packages, in all buildings, being taken from in front of unit doors. A board member had their package recently stolen. This is not a new thing nor is it only at Oak Bridge.

Just like single family homes, if packages are delivered when no one is home, you take the chance of it being stolen. Unfortunately, these are the times. Gone are the days where one could leave a package out all week and it would still be there!

The board highly recommends when having packages delivered here at Oak Bridge, have them delivered to a unit where you know someone will be home to accept your package for you, with permission of course.

Better yet, send your package where a signature is required. That way your package cannot just be left outside your door. There is nothing the board can do when packages are stolen. You must contact the delivery service and take it up with them.

Require a signature for package delivery – save yourself a headache during the festive holiday season.

Regards, BOD
