Good Afternoon,

Please note there is an issue opening B3 garage door from the inside. The hose you drive over is getting worn and at times does not work. There is nothing wrong with the garage door itself – please do not fiddle with the garage door as it is very expensive to repair.

If you stay to the right as you drive over the hose inside the garage, the door will open. If this does not work, you can always go outside and use your B3 garage card to open the door.

We do not want to keep this door permanently open with the storm coming tonight. We will get this repaired as soon after Christmas as possible. Thank you for your patience.

Happy Holidays!
