Good Afternoon,

**Did anyone see who did this?** The attached picture shows the damage done to the door leading to the back of B2, garage end.

Accidents do happen. But to leave this door as it is and not say anything is plain negligent and very disrespectful of the community and residents of Oak Bridge.

Leaving such damage to the building not only makes it extremely unsafe to residents of B2, but also increases the cost of heating the building as now we are heating Mother Nature! Never mind the liability of pipes freezing in the cold hallway!

The doors opening to the back of buildings 2 + 3 are NOT shoveled for a reason – it is dangerous to walk on the snow-covered lawn behind these buildings where it is at a steep incline.

Do NOT attempt to open these doors. Did you not see the snow pile up against the door?

The board is sending this out to all owners and tenants of Oak Bridge to please be good community citizens and “If you see something, say something. If you do something, say something.” Not saying anything means WE ALL PAY THE PRICE!

Regards, BOD
