Good Morning,

The board was just notified the ceiling work in building 3 garage will be complete end of business day today, what can be done this winter. The drain pipes have been insulated which should prevent them from freezing like last year.

In the spring when the garage warms up, the cosmetic portion of the ceiling will be completed. Mudding and painting cannot be done in the cold weather.

The board wants to thank you for your co-operation in moving your vehicles for this to work to be done. We realize it has been difficult moving your vehicle in/out of the garage in such cold weather.

Thank you,  
Board of Directors
