Good Evening OakB Owners and Residents,

**Recycling Terminated** - Due to contamination of recycling bins, the board had no choice but to terminate all recycling at OakB. This was a sad decision but the past 3 weeks recycling came back “contaminated”. OakB was charged an additional \$80 a week by the City of Concord for the contaminated recycling bins.

Effective with next week’s trash pick-up, there will be NO bins on property designated for recycling. All 6 bins can be used for household trash.

We encourage those who recycle to take their recycling to the City Transfer Station, 77 Old Turnpike Road, Concord NH. We thank all those who made efforts to separate and recycle their trash.

**Disinfecting Common Areas** - Please note all common area doorknobs/touch plates/push bars, elevator buttons and surfaces where people generally touch will have extra disinfecting done by our cleaning vendor at no extra cost. The extra cleaning started over 3 weeks ago. Please remember to wash your hands each time to enter your unit in case you touched any common area surfaces.

**Deck Repairs** - Deck repairs will begin as scheduled, weather permitting. Deck repairs fall under the umbrella of building safety and therefore are not prohibited under the Governor’s emergency order. No contact with unit residents is required to repairs decks. There are 21 decks on the list to be repaired in 2020. If you have not already received an email about your unit’s deck, you are not on the list to have your deck repaired in 2020.

Let’s hope we all stay safe and healthy!

Board of Directors
