Good Afternoon B2 Owners and Residents,

On next Thursday, May 28th starting approximately 8:30PM until at least midnight, the water in the building will be shut off to repair 2 cracked drainage pipes in the garage. These cracks developed with the freezing and thawing occurring in the garage area over 30+ years since the building was built.

We have scheduled the water shut off after hours to minimize the effect of no water on all residents. Please **DO NOT FLUSH YOUR TOILET** during this time. The main drainpipe will be open and all that waste water will flood the garage area, which will require an expensive hazardous waste mitigation to clean up.

We are asking vehicles parked under the open ceiling spots (units 33, 35, 87 and anyone else parked near the 2 opened garage ceiling spots) to **NOT** park in your garage spot so the plumbers can work effectively and to eliminate accidental damage to your vehicles. Any vehicles in the way of repairs will be called to move the vehicle. Any damage caused to vehicles not moved during repairs will be the vehicle owner's responsibility/expense.

Thank you for your co-operation while we make these repairs.

Regards,  
Board of Directors
