Good Afternoon B2 + B3 Owners and Residents,

Major maintenance and repairs of the garage fire protection system will be taking place across 3 days: Aug. 24-25 and Aug. 28 – starting approx. 7-8AM each day. This repair process requires the use of large water hoses which will run the entire length of the garage. When hoses are filled with water - YOU **CANNOT** DRIVE OVER THEM without damaging the hose.

The board strongly recommends you park outside during these days in case you need to use your vehicle during these repairs. You will NOT be allowed to drive over the water hoses when filled with water. Anyone who causes damage to the expensive hoses by driving over them when in use will be charged for damages. Your vehicle may remain in your garage spot if you are not planning on using it during repairs.

Again, thank you for your co-operation with this valuable building garage safety system maintenance and repairs.

It Takes a Village,
Board of Directors
