Good Morning,

We have scheduled repairs required by the City of Concord on the building water backflow devices. These repairs are scheduled for the end of this coming week:

Building 1 – water supply will be shut off THURSDAY May 17 from approximately 9AM for 3-5 hours depending upon the extent of the repairs.

Building 3 – water supply will be shut off FRIDAY May 18 from approximately 9AM for 3-5 hours depending upon the extent of the repairs

You may want to fill buckets or gallon containers with water before your water is shut off so you can re-fill your toilet tanks and flush your toilets.

We appreciate your co-operation and patience while these required repairs are completed.

Regards,
Board of Directors
