Good Evening Oak Bridge Owners and Resident,

Please note: Concord General Services' Highway and Utilities Division will begin flushing hydrants throughout Concord starting on Monday, April 15, 2019. This information was just received today.

For the next several weeks, three crews will be going out to different areas of the city to flush hydrants as part of required routine maintenance. This annual practice removes any sediment from pipes in the water distribution system and helps to sustain Concord's water quality and check water pressure of the area.

Based on the information found on the City of Concord website below, 120 Fisherville Road is scheduled to **have our 3 fire hydrants flushed on April 15**, between 6AM and 3PM.

Concord water customers should avoid doing laundry when hydrant flushing is occurring in their area. Customers may experience low water pressure and discolored water during their scheduled flushing time. If discoloration occurs, customers are advised to run their tap water on cold until the water runs clear.

Concord water customers are encouraged to visit the City of Concord's website to view flushing schedules and find out when flushing will be occurring in their area. Find flushing schedules and more information at [www.concordnh.gov/springoperations](http://www.concordnh.gov/springoperations).

Regards,

Board of Directors
