Good Evening B2 Owners and Residents,

The results of the City backflow testing require a few minor repairs where the city's water supply enters our buildings. City backflow testing occurs twice a year and is scheduled by the City.

On this **THURSDAY - OCTOBER 31** backflow repairs will begin in B2 starting approximately **9AM**.

Please expect the hot water and heat to be shut off for 1-3 hours, depending upon the extent of the repairs. The cold water should remain on. We cannot predict how long these repairs will take.

Please remember the club house has both bathroom and shower facilities for your use from 6AM to 9PM every day.

Thank you for your co-operation during repairs.
