Good Afternoon B2+B3 Owners and Tenants,

The normal fall/Oct. preventative maintenance (PM) on our 20+ year old building gas boilers came up with a laundry list of repairs which cannot be postponed until next spring. These repairs have been separated into 3 parts.

Part 1 of these repairs is scheduled to happen next Tuesday, 11/12. There may be disruptions in building heat and hot water during the day. Both buildings' boilers will be worked on that day and should only take one day total to complete if there are no issues.

Thank you for your patience while we continue to maintain our boilers.

Regards,  
Board of Directors
