Good Afternoon Building 1 Owners and Residents,

The entrances in your building look great! Now comes the new carpet installation. Just to restate, all the building's carpet and padding will be replaced except for the black carpet at each entrance landing, which is very expensive and still in good shape. All stairway steps and landings will be repaired as necessary.

The start date of carpet installation is Tuesday Feb. 18, 2020. The stairways will be done first. You will NOT be able to use the stairs where carpet is being replaced.

Please do **NOT** attempt to use the stairs when the carpet installers are working. Unlike the painters, the carpet workers will not let you pass. The disruptions to painting cost the Association more time and more money.

Once the stairways are complete, the hallways will be done. Please remove your door mats from the hallways before the carpeting is replaced. This will save the installers time and aggravation.

Thank you all in advance for your co-operation with this process. If anything should change, we will let you know.

Regards,
Board of Directors
Bishop REM 880-6464
