Good Morning Building 3 Owners and Residents,

This email is being sent to inform you the repairs to the first floor leak in the building's heating pipes is scheduled for this coming Tues. Feb. 2/11.

It is quite a project to do this necessary repair to the heating system in the middle of the winter when the water in the heat pipes is very hot.

Please note on Tuesday 2/11, starting at 4AM, the boilers in the building will be shut off so the water in the heat pipes can cool down enough to start the work on the first floor around 7-8AM.

This means there will be no heat in the building after 4AM until the repair is made which should be done by 12 noon. Fortunately, the hot and cold water will still be available throughout this repair. It may take a bit longer for the hot water to get back up to standard temperature once the repair is complete.

Thank you for your patience and co-operation during this repair.

Regards,

Board of Directors

Bishop REM 880-6464
