Good Afternoon B3 Owners and Tenants,

Great news - the hot water is now back on in the building. The repairs went very well and they finished 3 hours early. Please remember it will take a few hours for the water temperature to raise to normal. The hot water first coming out of the faucet may be a bit brown. There may be air pockets in the hot water pipes which will take care of itself once the hot water is flowing as normal.

Please notify management if there is anything wrong with the hot water starting tomorrow.

Regards,
BOD
