Good Evening OakB Owners and Residents,

Today, between the hours of 3-7PM, someone (we believe it was a child based on the matter found) had a bowel movement in the pool.

Effective immediately, the pool area is closed to the public for at least the next 3-4 days while we follow the CDC's and State's guidelines for fecal matter decontamination of public pools. Not only does the pool have to remain shocked for at least 36 hours, but we need to purchase 4 new pool filters at \$70 each. We cannot just clean and re-use the current filters.

We are sorry for the inconvenience.

Regards,

Board of Directors
